All the benefits of the Diamond Forever plan PLUS:  
First 150 miles of travel included  
Custom Playlist  
Rehearsal attendance (first 50 miles of travel included)

#### Wedding Reception:

I tend to pull from my full list of songs during receptions. A vast majority of the songs I play use backing tracks featuring guitar or piano, to standard karaoke tracks, to actual song backing tracks minus the original voice/instrument.

Dress Rehearsal: Generally unnecessary and discouraged.

#### Song Requests:

If you request a song in my set list, then the song request will be included in the price of the ceremony. If a song request is made that I do not have music for and I can find a backing track for, then I will create an arrangement of that song on violin to be premiered at the wedding for \$30. If you make a request for a song that I do not have and cannot find a backing track for, then I will let you know as soon as possible and work with you to find another song.

#### Travel:

Events located within 25 miles of my home<sup>1</sup> will not be charged for travel expenses. Any events 25 miles or farther from my home will be charge travel expenses at \$0.70 per mile<sup>2</sup>.

#### Payment Options:

Cash, check, money order, venmo, apple cash, and paypal to be paid no earlier than one week before the ceremony and no later than the day of the ceremony.

### Considerations for outdoor weddings:

Stringed instruments are very sensitive to weather, therefore various considerations need to be made depending on the various conditions.

#### Temperature:

The colder it gets, the slower my fingers will start to work. If the temperature is forecast to be below 50 degrees, I may ask for a mug of hot water to hold and keep my hands warm. If the wedding is on an unusually warm or humid day, I may ask for water if it is available.

#### Precipitation:

If rain or snow is forecast and should there be no contingency plan to move the wedding indoors if necessary, I will bring with me a 10X10 canopy tent that I may set up to keep myself, my instrument, and my equipment protected.

#### Wind:

I use an iPad for my music and a computer for my backing tracks. Excessive wind (usually over 25 mph) can be problematic. I may need to find an area near a building or plants that block some of the wind. Wind issues of this magnitude are quite rare, but still an issue to be aware of at times.

#### Sunshine:

---

<sup>1</sup>In Inver Grove Heights, MN.

<sup>2</sup> For example, if the location is 50 miles from my home, my total round trip travel will be 100 miles. 50 of those miles are beyond the 25 mile threshold from my home, meaning there are 50 billable miles totaling \$35

It's a great day when there is beautiful sunny weather for a wedding. However, the sun dries out violin wood which can result in the instrument being difficult to play and in worst case instances cause edges and seams to open needing repair. When possible, I will try to set up in an area with shade. If there is no shade and I determine that shade is absolutely necessary, I may request to erect my 10X10 canopy tent.
